Introduction.

Climate change is one of the most pressing issues of our time, and businesses have a critical role to play in addressing it. The training on 'Business and climate change' is designed to help you understand the impact of climate change on businesses and the opportunities and challenges it presents. It will provide you with a comprehensive understanding of how to mitigate the business risks of climate change and oversee a transition to net zero emissions for long-term resilience and overall value. You will learn how to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally. You will also learn how to use markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.

Business and Climate Change training course will highlight:

- The basics on climate change: Evidence and experiences.
- Business and climate change: Relations and impact.
- Climate change risks: Business opportunities and challenges.
- Internal strategies: Organizational sustainability.
- External strategies: Corporate citizenship.
- Mitigating the business risks of climate change.
- Transitioning to net zero emissions for long-term resilience and overall value.
- Identifying and implementing solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- Using markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.

Objectives

This training will focus on following items and enable you to use this unprecedented opportunity of embracing actions toward climate change and at the same time booming the business with more profit. This training course will discuss:

- The risks and opportunities that climate change creates for businesses in the 21st century
- You can analyze the current impacts of climate change on a global scale, and the investment shifts that are required to achieve a net-zero economy
- The training course can show how to move past short-term pressures,

policy uncertainty, and the difficulty of organizational and systems change, to develop and implement a strategic approach for successfully integrating climate change into business strategy

- You can also become confident in recommending tools that firms can use to become climate resilient and reduce their carbon footprint
- The training course can help you decide how your company can minimize its impact on the climate and the climate's impact on it
- You can investigate carbon accounting and its value to companies, alongside the efficacy of offsets

At the end of the training, you will learn to:

- A comprehensive understanding of how to mitigate the business risks of climate change and oversee a transition to net zero emissions for long-term resilience and overall value.
- How to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- How to use markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- How to become confident in recommending tools that firms can use to become climate resilient and reduce their carbon footprint.
- How to investigate carbon accounting and its value to companies, alongside the efficacy of offsets.
- How to decide how your company can minimize its impact on the climate and the climate's impact on it.

Training Methodology

We use advance adult learning practices to enhance the learning and experience of participants which include:

- Interactive lectures: Lectures that are interactive and engaging, with opportunities for participants to ask questions and engage in discussions.
- Case studies: Case studies that illustrate the impact of climate change on businesses and the opportunities and challenges it presents.
- Group work: Group work that encourages participants to work together to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- Practical exercises: Practical exercises that help participants become confident in recommending tools that firms can use to become climate resilient and reduce their carbon footprint

Organisational Impact

- The ability to mitigate the business risks of climate change and oversee a transition to net zero emissions for long-term resilience and overall value.
- The ability to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- The ability to use markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- The ability to become confident in recommending tools that firms can use to become climate resilient and reduce their carbon footprint.
- The ability to investigate carbon accounting and its value to companies, alongside the efficacy of offsets.
- The ability to decide how your company can minimize its impact on the climate and the climate's impact on it.

Personal Impact

- A comprehensive understanding of how to mitigate the business risks of climate change and oversee a transition to net zero emissions for long-term resilience and overall value.
- The ability to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- The ability to use markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.
- The ability to become confident in recommending tools that firms can use to become climate resilient and reduce their carbon footprint.
- The ability to investigate carbon accounting and its value to companies, alongside the efficacy of offsets.
- The ability to decide how your company can minimize its impact on the climate and the climate's impact on it.

Who Should Attend?

- Business leaders and executives who want to understand the impact of climate change on their businesses and the opportunities and challenges it presents.
- Sustainability professionals who want to learn how to mitigate the business risks of climate change and oversee a transition to net zero emissions for long-term resilience and overall value.
- Environmental professionals who want to learn how to identify and

implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally.

- Professionals seeking to upskill themselves in climate change risk, adaptation measures, and low carbon innovation. It is applicable to any business or industry and is taught in English.
- Investors who want to learn how to use markets and business skills to identify and implement solutions to mitigate, adapt to, or reverse climate change and its impacts on society globally
